

# Important Safety Instructions

**PLEASE READ CAREFULLY PRIOR TO  
Troubleshooting and Servicing Electrical Equipment**

**Definitions:**

**WARNING** (May cause serious injuries or death)

**CAUTION** (May cause property damage)

**For information on NuWhirl Instructions, see:  
[www.nuwhirl.com/docs/product-instructions.html](http://www.nuwhirl.com/docs/product-instructions.html)**

When installing and using this electrical equipment, basic safety precautions should always be followed, including:

- **WARNING:** Keep dry. Replace control if exposed to water, moisture or contamination
- **WARNING:** Use and follow these instructions along with all instructions that have been provided with your whirlpool bathtub in order to fully enjoy the bathtub safely.
- **WARNING** - Electronic control system components should be installed as per local and national Electrical Codes, in a location not to be subjected to splashing or flooding. Exposure to water or splashing will void all product certifications and warranties.
- There are no user serviceable parts inside. Opening, modifying, or tampering with control system components will void all product certifications and warranties.
- **WARNING** - Risk of electric shock. Connect only to a ground type receptacle or power supply junction box protected by a Ground-Fault Circuit Interrupter (GFCI). Contact a qualified electrician if you cannot verify that the power supply is protected by a GFCI. The GFCI should be tested on a routine basis. Consult the GFCI manufacturer's instructions for correct testing and operation.
- For electrical connections, see applicable wiring diagram. See [www.nuwhirl.com/docs/product-instructions.html](http://www.nuwhirl.com/docs/product-instructions.html)

- Do not use an extension cord to connect the product to the electric supply; provide a properly located receptacle or junction box.
- **WARNING:** Failure to install in strict accordance with each and every instruction above may compromise the system, which may cause injury to persons and/or property.
- The tub may be supplied from more than one power source. Before working on any electrical device, make sure all power to the control system is off.
- Use this unit only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer. Any improper installation or misuse of the equipment may result in injury to the user and will void the warranty.
- Do not run unit dry. Always be certain that the pump casing is filled with water before starting the unit. If pump fails to prime within 30 seconds, turn it off. Check if there is an airlock, clogged plumbing, or closed valve, and see troubleshooting section in this manual.
