

microOzone System Installation Instructions

Installation Diagram:

System Identification: SOZ-200XXX
System features: NuWhirl microOzone System

To any compatible
pump or blower
PX07500SCB Shown

NOTES:

- **Ventilation Required:** Do not install within an enclosure that would restrict ventilation.
- **No anti-siphon or condensate trap required.** Ozone tubing can run directly from the ozone generator to the inlet venturi.
- **Recommended Servicing:** NuWhirl recommends that the check valve and tubing be changed annually.
- **To be used in conjunction with all other product instructions published by NuWhirl.**
