

Hydro Light

Hydro Light is a water-driven ambient tub light which is powered by the whirlpool system pump.

- **Self-Contained Power Source:** The Hydro-Light is powered by the same pump that drives the whirlpool system. This eliminates the need for external wiring. No power cords required. *Patent Pending.*
- **Brilliant Illumination:** 18 LED lights in a slowly scrolling kaleidoscope of colors provide a soothing atmosphere and a relaxed bathing experience.
- **Simplified Installation:** The Hydro-Light is mounted through the tub wall and fed by the existing water line like another jet.
- **User Serviceable:** The lens is easily cleanable, and the light serviceable from the inside of the tub by simply removing two screws.
