ReNu! Sparkle Massage System

- **ReNu!** is an innovative jet system which creates a **sparkling massage** experience. The jets direct water downward at a 90 degree angle. The result is soothing currents of water and a sparkling stream of small bubbles.
- **ReNu!** features a water pump and heater replacing a traditional blower and air system. This creates the advantage of a quieter and more soothing bathing experience .
- Because **ReNu!**'s jets are directed downward, there is no splash on the deck or floor.
- **ReNu!** is less costly than other systems. Installation is simplified as a ReNu! system requires only 6-8 jets compared to the 16-24 jets plus additional components used in other systems.

ReNu! Sparkle Massage Directional Jet
Available in Chrome or White
Also Available in a Whirley Design
