## SINGLE LOAD CONTROLLER

### A SMART AND SIMPLE WAY TO INCREASE PROFITS FROM THERAPEUTIC TUBS

Typical bath controllers take up space, drive up costs, and crowd out important add-ons.

The TOUCHSTONE Single Load Controller is the **only** product of its kind: tiny, affordable, and versatile, it combines the features manufacturers need and customers want.

#### Get an Inexpensive Solution for Essential Features

Run single load systems like standard water jets, air massagers, and Infusion® Microbubble Therapy—as well as up to two LED lights.

#### Decrease Inventory Costs with Customizing Software

There's no need for stocking and swapping multiple types of controllers. Manufacturers can select features they want right from the production line.

# TOUCHSTONE<sup>®</sup>

## SINGLE LOAD CONTROLLER

**Simplify Manufacturing.  
Save Money. Support Installers.**

**More options for tub design.** Integrate a variety of features, including multi-speed blowers and brush-motored pumps, single-speed induction motored pumps, and LED lights.

**Change configurations easily.** At the push of a button, manufacturers can choose each of the features they want.

**Improve installation and servicing.** Our controller is one-third the size of comparable products and plugs directly into an easily accessible outlet.

### Features Overview

**Controller box that plugs directly into the wall**

**Support for multiple software configurations**

**Improved connection port arrangements**

**Waterproof and UL cURus listed**

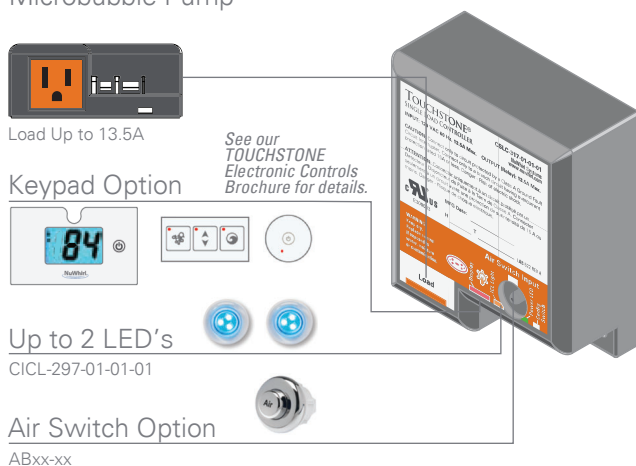

**Air switch with optional addressable keypad activation**
